Dear Hiring Manager,

I am writing to express my strong interest in mobile engineering opportunities with your organization. As an Associate Tech Lead at Omobio specializing in React Native mobile engineering, I bring nearly five years of experience shipping production mobile applications for telecom operators: from native module development in Java/Kotlin and Swift/Objective-C to app security hardening and in-app monetization. Having grown through every engineering level at Omobio and contributed to 25+ engagements across 9+ countries, I am confident in my ability to lead mobile delivery from architecture through store release.

In my current role, I lead a cross-functional engineering team of 10+ developers across mobile and platform initiatives. As Senior Software Engineer, I architected a fully custom native alarm engine from the ground up (~2,700 lines of native Java, Swift, and Objective-C across 26 files) and integrated RevenueCat for end-to-end in-app subscription purchasing across iOS and Android.

Key highlights of my career include:

- **Engineering Leadership** — Lead, mentor, and scale a 10+ developer mobile team as Associate Tech Lead; own architecture decisions and delivery quality across React Native platform initiatives.
- **Native Module Engineering** — Built a fully custom alarm engine on native Android and iOS notification APIs, plus a dual FCM/HMS push-notification pipeline solving Android delivery across a fragmented device ecosystem.
- **App Security & Fraud Prevention** — Hardened a banking-adjacent telecom app with certificate/public-key pinning and a device-integrity gate, and led a major RN version upgrade (0.59.3 to 0.70.5) with New Architecture scaffolding.
- **Ownership at Scale** — Owned Hutch Selfcare, Omobio's flagship React Native app, for 2+ years: a version upgrade (0.66.5 to 0.76.5) and 3+ feature change requests, managing releases across Play Store, App Store, and Huawei AppGallery.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am pursuing an M.Sc. in Artificial Intelligence at the University of Moratuwa.

I bring the same ownership and adaptability to every release, whether integrating a new native SDK or debugging a platform-specific edge case. I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
