Dear Hiring Manager,

I am writing to express my strong interest in web and backend engineering opportunities with your organization. As an Associate Tech Lead at Omobio through September 2026, specializing in web and backend engineering, I bring five years of experience delivering secure, scalable applications for telecom operators: from Next.js/React web platforms to REST API design and large-scale data/reporting systems. Having grown through every engineering level at Omobio and contributed to 20+ engagements across South Asia, Africa, and the Middle East, I am confident in my ability to own web delivery from architecture through production.

In that role, I led the SOR (Steering of Roaming) centralized reporting platform, architecting full-stack telecom data-reporting solutions from backend pipelines through web dashboards. As Senior Software Engineer, I led delivery of HOPP, Hutch's Next.js 14 web self-care portal, integrating third-party payment-gateway services across multiple payment methods and taking it to production.

Key highlights of my career include:

- **Engineering Leadership** - Led a 10+ developer team as Associate Tech Lead, directing web and reporting-platform delivery and serving as technical subject-matter expert for pre-sales engagements.
- **Data & Reporting Platforms** - Architected FirewallBI, a centralized on-prem telecom BI/reporting platform: hundreds of Logstash pipelines, a mutual-TLS Elasticsearch cluster, and a Python reconciliation framework.
- **Web Delivery & Payments** - Built HOPP (Next.js 14, App Router) with full payment-gateway integration, and contributed to the React admin-console frontend of Dialog's MDA device-management platform and a language-preference platform (Bangladesh).
- **SQL & Data Engineering** - Contributed to SQL/CDR reporting engineering for an SMSC billing platform, recovering ~85,000 dropped records and fixing a ~100x query-performance regression.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am pursuing an M.Sc. in Artificial Intelligence at the University of Moratuwa.

I bring a track record of translating ambiguous requirements into reliable systems, and would welcome the chance to discuss how my background aligns with your team's goals. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
