Relocating to Auckland, New Zealand in March 2027 – full, unrestricted open work rights via Partner Visa (no employer sponsorship required). Available for remote work in the interim.

Dear Hiring Manager,

I am writing to express my strong interest in engineering opportunities with your organisation that draw on my full-stack, mobile, web, and AI/ML background. As an Associate Tech Lead at Omobio through September 2026, with five years of progressive experience across mobile, web, and AI/ML engineering, I bring proven expertise across mobile, web, and backend engineering, alongside hands-on applied machine learning. Having grown through every engineering level at Omobio and contributed to 20+ engagements across South Asia, Africa, and the Middle East, I am confident in my ability to deliver measurable value across a broad technology stack.

In that role, I led a cross-functional team of 10+ developers across two flagship platforms: an AI/ML R&D initiative enhancing our SMS Firewall product with machine-learning-driven detection, and the SOR (Steering of Roaming) centralised reporting platform spanning backend pipelines and web dashboards. As Senior Software Engineer, I self-initiated our first AI/ML capability in telecom security, delivered mobile applications with native integrations, and built HOPP, Hutch's web self-care portal with payment-gateway integration.

Key highlights of my career include:

- **Engineering Leadership** - Led, mentored, and scaled a 10+ developer team as Associate Tech Lead; served as technical subject-matter expert for pre-sales engagements, producing architecture proposals and effort estimates.
- **Full-Stack Delivery** - Led delivery of 6+ production mobile apps (Hutch Selfcare, Vodafone Selfcare, My-Dialog, RetailHub, Circadian, SFA) live on Play Store, App Store, and Huawei AppGallery, alongside web platforms with payment-gateway integration.
- **Applied AI/ML** - Self-initiated and went on to lead an AI/ML R&D team that built fraud-detection modules (semantic embeddings, local-LLM GenAI, and ensemble ML classifiers) for an existing SMS Firewall product.
- **Data & Reporting Platforms** - Architected FirewallBI, a centralised on-prem telecom BI/reporting platform.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am pursuing an M.Sc. in Artificial Intelligence (by research) at the University of Moratuwa.

I approach unfamiliar domains as opportunities rather than barriers, and bring that adaptability and ownership to every engagement. I would welcome the opportunity to discuss how my background aligns with your team's goals. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
