

Pathmika Weerarathna

Associate Tech Lead | AI/ML Engineer

+94 723675513 | pathmikaweerarathna@gmail.com | Sri Lanka (relocating to Auckland, NZ)

LinkedIn | GitHub

Relocating to Auckland, New Zealand in March 2027 – full, unrestricted open work rights via Partner Visa (no employer sponsorship required). Available for remote work in the interim.

Dear Hiring Manager,

I am writing to express my strong interest in AI/ML engineering opportunities with your organisation. I am an AI/ML engineer and Associate Tech Lead at Omobio through September 2026, having self-initiated and led applied AI/ML capabilities in telecom fraud detection from the ground up, progressing from individual learning to leading an AI/ML R&D team. I bring hands-on experience building NLP/embedding-based detection, a GenAI subsystem on local LLMs, and ensemble ML classifiers, backed by five years of full-stack software engineering fundamentals.

In that role, I led the AI/ML R&D team building a modular SMS Firewall AI/ML Suite (containerised detection modules for OTP-bypass, phishing-URL, encoded-Unicode, grey-route, and campaign detection) and served as technical subject-matter expert for AI/ML pre-sales engagements across Africa, South Asia, and the Middle East. As Senior Software Engineer, I built the suite's OTP-bypass/grey-route module using semantic-embedding and similarity-matching techniques.

Key highlights of my career include:

- **Applied ML Systems** - Built the suite's phishing-URL detection module (an ensemble ML classifier with explainability and hyperparameter tuning) and its local-LLM GenAI subsystem for content review and translation.
- **Applied Fraud Detection** - Contributed AI/ML risk-scoring (classification models and social-graph analysis for SIM-box-ring detection) to an R&D flash-call fraud-detection system on telecom signalling.
- **Predictive Analytics** - Built a working churn/CLV-prediction prototype with an API backend and dashboard UI, supporting a multi-module predictive-analytics platform proposal.
- **Engineering Leadership** - Mentored a cross-functional team of 10+ developers on ML engineering practices, code review, and CI/CD, while maintaining full-stack fundamentals across mobile and web.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am pursuing an M.Sc. in Artificial Intelligence (by research) at the University of Moratuwa, having applied that knowledge directly in my day-to-day work.

My entry into AI/ML with no prior background, and progression to team leadership, shows I approach unfamiliar domains as opportunities. I would welcome the opportunity to discuss how my background aligns with your team's goals. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
