Relocating to Auckland, New Zealand in March 2027 – full, unrestricted open work rights via Partner Visa (no employer sponsorship required). Available for remote work in the interim.

Dear Hiring Manager,

I am writing to express my strong interest in full-stack engineering opportunities with your organisation. As an Associate Tech Lead at Omobio through September 2026, specialising in full-stack engineering across mobile and web, I bring five years of experience shipping production applications for telecom operators: from mobile development to web platforms and REST API/backend design. Having grown through every engineering level within the same organisation and contributed to 20+ client and product engagements across South Asia, Africa, and the Middle East, I am confident in my ability to own delivery end-to-end, regardless of platform.

In that role, I led two flagship full-stack platforms: the SMS Firewall AI/ML Suite (backend ML services integrated with reporting dashboards) and the SOR (Steering of Roaming) centralised reporting platform. As Senior Software Engineer, I contributed to SQL/CDR reporting engineering that recovered ~85,000 dropped records, developed React Native mobile solutions with native integration, and built HOPP, Hutch's Next.js web self-care portal.

Key highlights of my career include:

- **Engineering Leadership** - Led a 10+ developer team as Associate Tech Lead across mobile, web, and AI/ML-integrated platforms; served as technical subject-matter expert for pre-sales engagements, producing architecture proposals and SOW input.
- **Mobile Delivery** - Developed a fully custom native alarm engine to replace third-party libraries, and integrated in-app subscription purchasing across iOS and Android.
- **Web & Data Delivery** - Built HOPP with full payment-gateway integration, and architected FirewallBI, a centralised on-prem telecom BI/reporting platform.
- **End-to-End Ownership** - Owned Hutch Selfcare for 2+ years across two engineering roles, and contributed to SQL/CDR reporting engineering that fixed a ~100x query-performance regression on an SMSC billing platform.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am currently deepening my machine learning expertise through an M.Sc. in Artificial Intelligence (by research) at the University of Moratuwa.

I bring the same ownership to a native mobile release as I do to a backend reporting pipeline. I would welcome the opportunity to discuss how my background aligns with your team's goals. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
