Relocating to Auckland, New Zealand in March 2027 – full, unrestricted open work rights via Partner Visa (no employer sponsorship required). Available for remote work in the interim.

Dear Hiring Manager,

I am writing to express my strong interest in mobile engineering opportunities with your organisation. As an Associate Tech Lead at Omobio through September 2026, specialising in React Native mobile engineering, I bring five years of experience shipping production mobile applications for telecom operators: from native module development to app security hardening and in-app monetisation. Having grown through every engineering level at Omobio and contributed to 20+ engagements across South Asia, Africa, and the Middle East, I am confident in my ability to lead mobile delivery from architecture through store release.

In that role, I led a cross-functional engineering team of 10+ developers across mobile and platform initiatives. As Senior Software Engineer, I developed a fully custom native alarm engine from the ground up to replace third-party libraries, and integrated in-app subscription purchasing across iOS and Android.

Key highlights of my career include:

- **Engineering Leadership** - Led, mentored, and scaled a 10+ developer mobile team as Associate Tech Lead; owned architecture decisions and delivery quality across React Native platform initiatives.
- **Native Module Engineering** - Built a fully custom alarm engine on native Android and iOS notification APIs, plus a dual push-notification pipeline handling Android delivery across Google and Huawei device ecosystems.
- **App Security & Fraud Prevention** - Hardened a telecom self-care app with certificate/public-key pinning and a device-integrity gate, and led a major React Native version upgrade with New Architecture scaffolding.
- **Ownership at Scale** - Owned Hutch Selfcare, Omobio's flagship React Native app, for 2+ years: a major version upgrade and 3+ feature change requests, managing releases across major app stores.

My technical foundation is backed by a B.Sc. in Information Systems (Second Class Upper Division) from the University of Colombo School of Computing, and I am pursuing an M.Sc. in Artificial Intelligence (by research) at the University of Moratuwa.

I bring the same ownership and adaptability to every release, whether integrating a new native SDK or debugging a platform-specific edge case. I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for considering my application.

Kind regards,

Pathmika Weerarathna

Associate Tech Lead, Omobio (Pvt) Ltd

B.Sc. Information Systems, University of Colombo School of Computing | M.Sc. Artificial Intelligence, University of Moratuwa
